

DISTRIBUTION DEMAND AND VOLTAGE CONTROL PROGRAM

POLICY

04A - 2014

OBJECTIVE:

To be able to identify the procedures associated in the implementation of demand and voltage control to be compliant with the standards set in the Philippine Grid Code (PGC) and Philippine Distribution Code (PDC).

BACKGROUND:

As provided in the PDC, the demand control is being implemented by the distribution utility when the System Operator has issued a red alert notice due to a generation deficiency in the grid. This measure is necessary to secure the grid by ensuring that the frequency of the grid during emergency conditions is maintained within the limits prescribed by the PGC.

On the other hand, voltage control is a strategy used by the distribution utility to maintain the voltage of the distribution system within the limits prescribed by the PDC.

POLICY CONTENT:

It shall be the policy of this electric cooperative to

- a. implement demand and voltage control program to aid in securing the grid; and
- b. properly coordinate with the affected users or consumers the activity if the demand control is implemented to safeguard the distribution system.

PROCEDURES:

The implementation of this policy shall be governed by the attached procedures for the implementation of demand and voltage control. These procedures may be revised by management to be compliant to the new or amended provisions and requirements of the PDC.

RESPONSIBILITY:

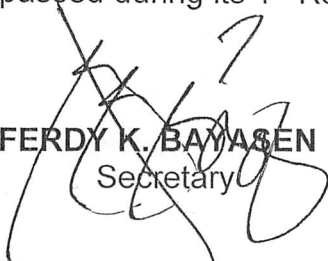

The responsibility of implementing this policy rests on the General Manager.

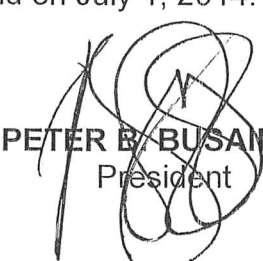

EFFECTIVITY:

This policy shall take effect upon the approval by the Board of Directors.

APPROVAL:

Approved by the Board of Directors through Board Resolution No. 74-2014 passed during its 1st Regular Board Meeting held on July 1, 2014.

FERDY K. BAYASEN
Secretary

PETER B. BUSAING
President

Note: Approved per BOD Resolution No. 74-2014
