

POWER USE DEVELOPMENT

POLICY 7-1

PURPOSE:

To establish policies on power use development through Project Tanglaw.

INTRODUCTION:

To help improve and develop the educational and environmental facilities of the communities within the coverage areas, the National electrification Administration launched the Project Tanglaw (Towards Aggressive National Growth Through Light and Water).

As its name implies, it will greatly enhance the social and economic well-being of the rural people through a self-help community project scheme.

Knowing fully well that the cooperative can further help the communities through this worthy project, the Board hereby adopts the following policies:

POLICIES:

1. The Cooperative through Project Tanglaw shall undertake the electrification of public schools willing to avail themselves of this project, to help maximize the use of their facilities.
2. The Cooperative shall undertake the installation of electricity-driven school water system to have a safe, potable, and sufficient water supply.
3. The Department of Education and Culture (DECS), through the local school officials, shall assume the central role in the implementation of the electrification of the school houses.
4. The Cooperative, assisted by NEA, shall:
 - a. extend electric service to the schools
 - b. grant scholarship loan when needed
 - c. assist in planning of schools to be electrified
 - d. provide tutorial assistance in technical courses.
5. Payment of housewiring materials and electric bills shall come from the local government, schools, organizations and various sources.

IMPLEMENTATION: The General Manager shall be responsible for the implementation of this policy.
