

## SALVAGE

### POLICY 5-6

**PURPOSE:** To provide guidelines for the retirement and turnover of salvaged materials to the warehouse.

#### INTRODUCTION:

In an effort to establish the voltage in the coverage area, rehabilitation of the system will be undertaken. This will be a continuing activity because of the desire of the cooperative to keep the systems loss at its lowest level. In the process, a lot of electrical materials are bound to be retired.

Towards this end, the Board adopts the following policies:

#### POLICIES:

1. An inventory of all materials to be retired shall be made and a corresponding blanket work order number for retirement shall be assigned.
2. All retired and salvaged materials shall be turned-over immediately to the warehouse for proper accounting and safekeeping, indicating the quantity and the location where such materials were retired/salvaged.
3. In case where some of the materials are claimed to be owned by individual consumers, a proof of ownership, satisfactory to the cooperative, shall be presented before said materials are to be released.
4. In case the cooperative has no need for the salvaged materials, disposal of the same shall be done through public bidding.

#### IMPLEMENTATION:

The General Manager shall be responsible for the implementation of this policy.

(SGD) MANUEL E. GONZALES JR.

(SGD) ABUNDIO M. AWAL
